

I am writing in regards to proceeding CG 02-278. I am asking that the FCC not implement any proposal that would lessen the effectiveness of Indiana's Telephone Privacy Law.

Since I registered my phone numbers with Indiana I have almost completely stopped getting unwanted & annoying phone calls. I used to receive approximately 20 - 25 unwanted calls a week. Now I receive approximately 3 - 5. My families home life has dramatically improved. We are rarely interrupted during dinner. My kids are not awakened after bedtime. My wife and I can finally enjoy the home we have dreamed of owning without unwanted & annoying interruptions.

I know that no law will be perfect, but I believe Indiana has struck a good balance. I ask that the FCC not implement any new laws that would decrease the effectiveness of my state's laws.

Respectfully,
Charles Benslay
